

Web Design Internship

What doesn't change at GMR is what drives us: making an impact. For a brand, the end goal is getting into people's lives, and staying there. Not an easy task – but it's what we do every day.

Who is GMR?

- We are passionate for creating innovative, robust applications
- We develop dynamic, custom web-based and mobile applications for marketing programs
- We are passionate for our work and our clients
- We are known for creative thinking and strategic solutions

What you'll be doing:

We couldn't live without the phenomenal folks in our Digital and IT departments. On the Digital project side, we create custom apps, games, websites, and interactive event technologies for a wide range of clients and marketing campaigns. We love our digital/design team and keep them busy, but not so busy that they miss out on happy hour—because you know they're the life of the party.

In this 3 month internship, you will:

- Assist and participate in the creation of interactive Web-, Mobile- and Kiosk-Based solutions for GMR client's marketing programs
- Help Web Designers/Developers with transforming design mock-ups to W3C standards compliant HTML pages using XHTML, CSS, PhotoShop and/or Flash
- Support Web Design-Developer with using PhotoShop files, providing pixel-perfect HTML and Flash representations of original designs across all major browsers and email clients

Who are you?

- You are a sophomore or junior
- You are working towards a degree related to technology or equivalent experience with some technical experience.
- You have the ability to apply object-oriented design principles to create extensible, maintainable applications
- You are dedicated to exceeding expectations and meeting deadlines
- You have a strong, team-oriented work ethic
- You have strong time management skills and great attention for detail

Your software skills:

- Basic XHTML and CSS skills
- AJAX (GWT) , Javascript, and JQuery will be a major plus
- Basic Flash development skills
- PhotoShop
